

# Gallion Integration Blueprint

A proven, phased approach to connecting your  
**EHR, ERP, and bill-only workflows.**

## EHR

### Inbound

HL7 messages & flat files to consume:

- › Surgery details
- › Case staff
- › Surgery items
- › Procedure information

## ERP

### Inbound

Flat files or API calls to consume:

- › Item Master information
- › Contracting information
- › Requisition, purchase order, and invoice information
- › Requesting/Requester information

### Outbound

Flat file for requisition creation.

## Other Systems

- › **Benchmarking:** send and receive files for analytics
- › **Identity management:** for user login (with SSO available)
- › Applications used for clinical outcomes and the cost of case reporting

## Authentication & Security

- › **HITRUST Certified**
- › All data flows securely through VPN and SFTP channels
- › Cloud-based SaaS
