

Manual vs. Automated Workflows Comparison

How connected, digital bill-only workflows reduce waste, rework, and revenue risk across your implant supply chain.

Gallion Bill-Only Process

- Efficient Time Use**
Staff no longer spends time chasing and manually reconciling bill sheets
- Automated, Digital Processes**
Automatic synchronicity between consumed items, charged items, and contract compliance
- Contract Compliance**
Higher accuracy, high transparency and enhanced cost control
- Transparent Data**
Items consumed and bill sheet charges visible and consistent with the charges
- Fully Integrated System**
Interoperability between multiple IT systems creates a streamlined process
- Shorter Revenue Cycle**
Low manual labor and high system throughput speeds the revenue cycle process

Bill Sheet Submission

Bill Completion
Claim Submission

Traditional Bill Sheet Process

- Lack of Visibility**
Items consumed and bill sheet charges that are inconsistent with consumed items
- Manual & Tedious Processes**
To ensure synchronicity between consumed items, charged items, and contract compliance
- Contract Non-Compliance**
Lower accuracy, lower transparency & lower cost control (due to price discrepancies)
- Staff Time Drain**
Errors and unresolved issues result in rework and drain on staff time
- No System Integration**
Disconnect between multiple IT systems complicates the process and results in substantial rework
- Long Revenue Cycle**
Labor intensive process and high volumes of bill sheet delays revenue cycle
