

# A One-Stop, Clinically Integrated Bill-only Solution

Gallion optimizes bill-only purchases and payments, consolidating them into one user-friendly, collaborative digital application

Our bill-only implant management system eliminates manual processes and improves accuracy, efficiency, transparency, and costs.

## Digital Bill Sheets

**Vendors** can easily generate an electronic bill sheet during a procedure, so there are no handwritten forms to track.

## Real-Time EHR & ERP Validation

**Perioperative staff** receive confirmation by the end of a procedure that the bill sheet matches the EHR, so they can fix any discrepancies immediately.

## Accurate Purchase Orders

**Supply chain managers** are notified if the billed amount doesn't match the ERP contracted price, so they can make corrections before Gallion creates the purchase order.

## Timely Payments

Because errors are flagged during the process, billers have less downstream manual reconciliation, so they can manage a high volume of payments more efficiently.
